About Us

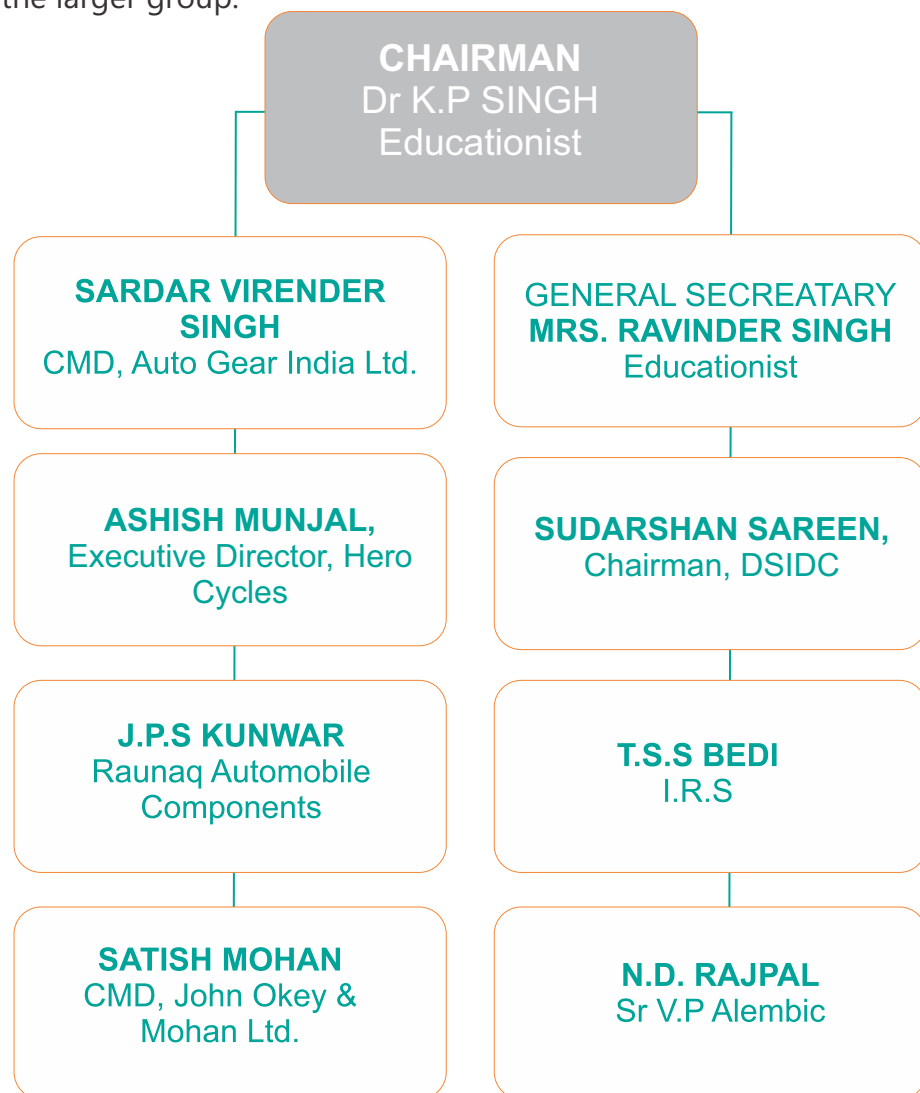

Nimt is a group of institutions operating in North India. The group started in 1992 with a vision to improve the delivery of education in the country. With a senior secondary school already in place in the year 1987, the group was focused in its goal to reform education system at all levels. After five years of educating young students, the group stepped into higher education with NIMT, Ghaziabad offering Management courses at graduate and postgraduate level to the students.

Today, the group offers education from pre nursery up till Ph.D. in domains such as engineering, management, medical, Para medical, hospitality, science, pharmacy and education for teachers. The group has campuses spread across five acres in Ghaziabad, Greater Noida and Kotputli, Jaipur. The group also in its efforts to contribute to society has established a 100 Bedded CGHS empanelled Hospital in Greater Noida that serves a large village and urban population in the area. The hospital is a multi specialty hospital with all the modern facilities and services at affordable rates.

GOVERNING BODY

Unique portfolio faculty model. Visiting faculty from our schools and other top global b schools complement the expertise of our resident faculty. Currently there are 7 resident faculty member at full capacity. The school will have a ratio of 60:40 with international faculty forming the larger group.

MISSION

NIMT strives to contribute to the professional management of those Socio-Economic Institutions which serve the public good, specially the organized industries in Rural. Health and other Public Systems. Campus Society hopes to contribute to the orderly growth and progress of the nation towards more prosperous, fast and humane society.

In promoting professional management through its education, training and research activities, the Institute desires to emphasize a humane approach to work and management, along with technical competence, managerial excellence, indianization of managerial practices, social & ethical responsibilities, special concern for the weaker sections of society, dedication to work and social justice.

In its training programs, NIMT strives first to broaden the knowledge and perspective of present and future managers & professionals by providing them rigorous training in the most appropriate skills and techniques and enthusing in them, a quest for professional excellence. Second, it emphasizes the development of critical, analytical, problem-solving and

Medical and Para Medical

There is an increasing realisation on the importance of paramedical personnel in the health sector, especially in accident and trauma care. Paramedics are a boon to nursing homes and a dream for students, who have not been able to become full-fledged medical professionals. Health care delivery systems are undergoing rapid changes and the demand for skilled paramedical personnel is on the rise.

Almost all the diagnostic procedures are carried out by the paramedical staff and they have emerged a vital cog in the wheel of the health care delivery system. The population explosion coupled with the mushrooming of private and corporate hospitals has provided numerous opportunities for skilled paramedics.

Now, what's important is to know more about such 'Professionals' who do a Blood Test or a massage or a therapy and aid the doctor for better treatment of the patient & hence make health care easy and effective. These Professionals are called as "Paramedics"

Medical education is very important. Without the proper education, no one would be treated properly for serious injuries or sickness. There are different types of medical education. There are people who go into the billing and coding aspect of the medical field, while others prefer to be hands on with the patients. The longest medical education is to become a doctor or surgeon. Ones who have a speciality have to take longer time getting to know their expertise and carrying out medical procedures. It is a great accomplishment, but it takes a great deal of time and work. It takes so long to become particular nurses and doctors because peoples lives are at hand. You must know what you are doing before you can administer any drug or diagnose a patient. But no other profession is as rewarding as Medical and para medical profession because of so high moral, monetary & reputative satisfaction in the society.

B.Sc (Radiology & Imaging)

Bachelor Of Physiotherapy

B.Sc (Nursing)

GNM - General
Nursing Midwifery

DPT - Diploma
Of Physiotherapy

OTT - Operation
Threatre Technician

B.Sc - Radiology & Imaging

Cutting edge technology. Engaging faculty.

Radiology is a medical specialty that employs the use of imaging to both diagnose and treat disease visualised within the human body. Radiologists use an array of imaging technologies (such as X-ray radiography, ultrasound, computed tomography (CT), nuclear medicine, positron emission tomography (PET) and magnetic resonance imaging (MRI) to diagnose or treat diseases. Interventional radiology is the performance of (usually minimally invasive) medical procedures with the guidance of imaging technologies. The acquisition of medical imaging is usually carried out by the radiographer or radiologic technologist. The radiologist then interprets or "reads" the images and produces a report of their findings and impression or diagnosis. This report is then transmitted to the ordering physician, either routinely or emergently

The common subjects of basics in Anatomy, Physiology, Pathology, Microbiology, Surgery & Medicine taught in the 1st year will prepare the student to understand the nature of disease. The hands on experience in the department of Radiology from day one onwards will enable the student to understand the nature of the illness beginning with routine imaging to CT and MRI scans. The students will receive excellent and exhaustive training in these fields to be able to assist senior radiologists.

Ample opportunities as radiologist in diagnostic imaging centres, super specialty hospitals, government and private hospitals. Self employment opportunities as well as option to pursue further studies are also available to radiologist.

COURSE DETAILS

Course Duration: 4 years

Institute: Nimt Institute of Medical and Para- Medical Sciences, Greater Noida.

College Code: 306

Format: Regular

Approval: UP STATE MEDICAL FACULTY

Affiliation: CCS UNIVERSITY, MEERUT

Eligibility: Pass with 50% (45% for SC/ST/OBC) aggregate marks in 10+2 or equivalent (with English)

BPT - Bachelor of Physiotherapy

Learn. Empower. Heal.

Physiotherapy plays an important role in rehabilitating patient to his or her pre-disease status. It is said that a physician adds years to life while a Physiotherapist adds life to years.

During the course of four years, the program provides an educational experience of the essentials required for the health care in the country. The educational process involves problems based learning, which enables the students to identify, discuss and analyze various dysfunctions incorporating institutional management as well as community based rehabilitation. The learning process is further strengthened during 6 months of mandatory, rotatory internship program where students learn to treat the patients under the guidance and supervision of competent teachers.

The college and physiotherapy O.P.D. are very well equipped with modern and advanced Electrotherapeutic and Exercise therapeutic equipments. There is also an advanced Electro-physiology and Exercise physiology laboratory for Electro Diagnosis and Fitness program respectively. The faculty comprises of well qualified, competent, enthusiastic teachers.

“Education purpose is to replace an empty mind with an open one”

- Malcolm S. Forbes

Students learn basis sciences in first two years and implementation of the same on patients in third and final year. Faculty helps the students to understand functional diagnosis and management of the patient, aimed at learning structural and functional impairments, activity limitation and participation restriction with particular emphasis given on clinical reasoning. There is good intra and inter faculty interaction and various integrated programs are held to bring about a good learning experience.

COURSE AIM

On completion of the course of study having successfully passed the examination, the candidate would be able to achieve a satisfactory level of efficiency:-

1.To Detect and evaluate the anatomical, pathophysiological impairments, resulting in dysfunction of various age groups & occupation; as well as epidemiological sectors in

the population & arrive at appropriate diagnosis.

2.To understand the rationale & basic investigative approach to the medical system and surgical intervention regimens & accordingly plan & implement specific Physiotherapy measures effectively.

3.To be able to select strategies for cure and care; adopt restorative & rehabilitative measures for maximum possible independence of a client at home, work place & in the community.

4.To maintain healthy relationship & Co-partnership with various professionals in the health delivery system in the primary interest of a client.

5.To ensure quality assurance & motivate the client & her/his family for a desirable client compliance.

6.To develop communication skills for the purpose of transfer of suitable technique to be used creatively at various stages of treatment, compatible with psychological status of the beneficiary.

7.To promote health in general in Geriatrics, Women's health, Industrial medicine as well as at competitive level, such as sports, keeping in mind National Health Policies.

8.To practice professional autonomy & ethical principles with referral as well as first contact clients in conformity with ethical code for physiotherapists.

COURSE DETAILS

Course Duration: 4 years

Institute: Nimt Institute of Medical and Para- Medical Sciences, Greater Noida.

College Code: 306

Eligibility: Pass with 50%(45% for SC/ST/OBC) aggregate marks in 10+2(Medical) or equivalent (with English)

B.Pharma

Pharmacy students are immersed in a learning environment that is nurturing, stimulating and inter-disciplinary. The experience will prepare them for life-long careers as medication experts, clinical researchers and pharmaceutical scientists in the evolving health services, fast-paced pharmaceutical and other industries, and to meet the many challenges posed by shifts in patients' age and demographics, changes in disease patterns and revolutionary advances in science and technology.

The Department also offers abundant opportunities for postgraduate education in which students with basic degrees in pharmacy, medicine, engineering or science are prepared to become researchers, educators and leaders in local and global enterprises.

PHARMACY CURRICULUM

In recognition of the diverse career options of NIMT-trained pharmacists and pharmaceutical scientists, our curriculum provides a broad-base education that has a strong foundation in biomedical and pharmaceutical sciences. This foundation in the sciences serves as a basis for the development of clinical skills in areas of pharmacy practice that are patient oriented. In a nutshell, the curriculum focuses on the Drug, the Product and the Patient. Under modules about the Drug, students learn to integrate how the properties of a drug molecule impact its pharmacokinetic profile

and how changes in physicochemical properties of a drug molecule modify its biotransformation. The Product modules provide an integrated overview of the health product development process, with a focus on patient-user safety.

Under modules about the Patient, students learn about the structure, functions, disease states of and drug effects on the human body before acquiring the essential skills to manage health products for the best patient-user outcome. Overall, students acquire a sound foundation in scientific knowledge, a high level of core competencies in pharmacy practice, professional ethics and work attitude, and generic skills for life-long employability

B.Sc (Nursing)

Nursing science is a discipline that requires nurses' continuous professionalism throughout their life. Nursing professionals also need to be highly skillful in order to meet the client's comprehensive health care needs and to expand their professional functions in solving various problems. In addition, nurses need to demonstrate leadership by coordination with other health professionals.

In order to achieve these aims, NIMT Institute of Medical and Para Medical Sciences believes in endorsing excellence in every area of its teaching, maintaining and developing its position as world Class College to enrich international and regional communities through the skill of its nursing graduates. The College also pursues ideal healthcare that fits the local culture and lifestyle and provides learning activities rich with practical and applied educational materials based on research findings. It therefore believes in guiding the students to the profession through its unique educational program.

Each faculty of the institution assumes the responsibility as to be the role model and helps in creating learning environment that enables students to acquire driven, self directed learning and foster an attitude of life long lasting.

ENGINEERING

Our degree programs are designed to be flexible and responsive to the needs of students and employers. We equip our students with the edge that sets them apart from their peers. We inculcate in our students computational thinking and life-long learning skills, which help them see complex problems through a creative lens, formulate the problems in an innovative way, and solve the problems in simple elegant steps. They learn to develop useful technologies and systems that can change our lives, and they are encouraged to do so with human ingenuity and from a global perspective. They learn to embrace calculated risk-taking and acquire the tenacity to take on challenges and resolve them logically and efficiently. With these timeless skills, they deftly handle tasks as varied as running an enterprise or resolving the scheduling

Many of the challenges faced by the world today such as climate change, clean energy and aging related health issues require creative engineering solutions that integrate knowledge from multiple disciplines. The Department of Engineering provides a number of flexible and innovative alternative learning pathways.

"Our mission is to nurture engineer leaders by providing an education that brings out the full potential and talents of students and equipping them with the knowledge and skills to deliver innovative solutions to complex multidisciplinary problems."

B.Tech - Electrical & Electronics Engineering

Department of Computer Science & IT

The Department of Computer Science is a centre for research and education at the undergraduate and graduate levels. Some 80 faculty members form strong internationally competitive research groups in the areas of artificial intelligence, computational biology, database management, media, systems & networking, and programming languages & software engineering. Their works define the cutting edge in defense mechanisms against virus attack in distributed systems, in multimedia multimodal precise question answering, in intelligent analysis of programming errors, and many more. They have been honored with myriad international and local awards for their many contributions and leadership in computer science research.

The programs that our department offers are founded on this strong and vibrant base. Our graduates are computer scientists who can integrate computing related theories and practices, and appreciate the value of good engineering design. Their training, which is undergirded with computational thinking, provides them mastery of a technology with great power to change the world, ranging from the sciences, to financial services, engineering and entertainment.

"How many fields can you get right out of university and define substantial aspects of a product that is going to go out and over 100 million people are going to use it?"
– Bill Gates

DEPARTMENT OF CIVIL ENGINEERING

Learn. Build. Grow.

Civil engineers are creators of wealth as their projects stimulate growth for other sectors of the economy. With increased expectations for a higher quality of life, civil engineers are needed to plan and design increasingly complex projects. They also improve infrastructure for sustainable development such as structures that can withstand natural and man-made disasters. Currently, unprecedented growth is being

experienced in the design and fabrication of offshore rigs, semi-submersibles and structures with facilities and equipment for the oil and gas industry.

The Department of Civil Engineering plays a critical role in transforming students with a good background in physics and mathematics to graduates with a strong competence in structural engineering. We train engineer-leaders with strong fundamentals in civil engineering complemented with a knowledge in management, economics and law.

Department of Electrical and Electronic Engineering

In a rapidly evolving technological world, electrical engineering (EE) plays an important role in the creation of new ideas, products and solutions. At the Electrical & Computer

Engineering (ECE) department, we provide a nurturing environment which prepares students for a career in industry, business or research. EE graduates will have strong foundations in the fundamental concepts and analytical tools of contemporary electrical engineering including electronics circuit design, signal processing, signals, systems and control, microprocessor systems and physics of semiconductor devices. With their solid foundation, they are amongst the most versatile graduates who will be able to take on diverse careers.

Students who are keen in research will have opportunities to work in areas as diverse as nanotechnology, biomedical engineering, interactive digital media, games, intelligent systems, energy systems, renewal energies, robotics, communications and integrated circuit design.

Department of Mechanical Engineering

Mechanical engineers are involved in the research, development and design of a diverse range of products. Hence, the program aims to equip students with key engineering knowledge and skills which are fundamental to their onward progression to more complex and specialized applications. Practical design is also an integral part of the program. Industry tie-ups enable students to work on design projects sponsored by companies, giving students an insight into

design cycles in commercial enterprises. the prospects for mechanical engineers also remain bright as high-technology industries will continue to be a key engine of growth for the country.

- ✓ Post Graduate Diploma in Management (PGDM)
- ✓ Fellow Program in Management (FPM)

MANAGEMENT COURSES

WHY THE NIMT MBA/PGDM?

Top 7 reasons to choose NIMT PGDM and MBA

1. Specializations to Meet Every Need

The NIMT MBA offers specializations in over 29 fields that includes finance, marketing, strategy and organization, real estate.

2. Network with the Best

Gain international exposure through overseas student exchanges, student-led study trips, business case competitions and much more.

3. Stellar Teaching Faculty

The NIMT MBA has teaching staff from internationally renowned universities who are able to combine western business insights with Asian perspectives.

4. World Class Institute

The NIMT has a long tradition in excellence and a first rate reputation that is well-known throughout the world. The Institute has been successful in carving a niche for itself on the international management education map.

5. Top Notch Learning Facilities

Learn from the best in a comfortable, conducive and convenient environment with state-of-the-art facilities.

6. Learning from Diversity

NIMT MBA students come from over 35 countries and nationalities and have a wealth of industry experience and knowledge ranging from Banking and Financial Services to Engineering to Non-Profit Organizations.

7. Global Alumni Network

As NIMT MBA graduate, you will be part of the more than 10,000 NIMT Business School alumni represented in over 30 major cities and counting.

MBA - MASTER OF BUSINESS ADMINISTRATION

MASTER YOUR POTENTIAL

The Master of Business Administration (MBA or M.B.A.) is a master's degree in business administration, which attracts people from a wide range of academic disciplines. The core courses in the MBA program are designed to introduce students to the various areas of business such as accounting, finance, marketing, human resources, operations management, etc. Students in MBA programs have the option of taking general business courses throughout the program or can select an area of concentration and focus approximately one-fourth of their studies in this subject.

MBA programs are structured around core courses, typically taken at the start of the MBA, and elective courses allowing for a subject specialty or concentration. The core curriculum is essentially standard. A thesis, preceded by additional course work in research methodology, is usually required. Some programs instead allow for a "Major Project". Typically, in the program's first part (first year), students will acquire the analytical tools necessary for academic training in the key management functions, as well as a working knowledge of these functions. In the second part (second year) students pursue a specialized

curriculum. "Business Strategy", where the key areas are synthesized or integrated, is usually offered as a capstone course; related participation in a business simulation or game is a common degree requirement. Course work in Business ethics may be included in the first or second part (or both), with a correspondingly different focus.

PGDM - POST GRADUATE DIPLOMA IN MANAGEMENT

The 2 Year Post Graduate Diploma in Management (PGDM) is a full time, residential program equivalent to MBA offering 29 specializations in Finance, Operations, Marketing and Information Management and several more. PGDM is equivalent to MBA(as per AIU - All India Association of Indian Universities).

The objective of the program is to groom graduates to experience as:

Socially sensitive value driven leaders.

Having integrated knowledge of selected functions in the global environment.

The program is recognized by AICTE.

"The program is equivalent to MBA as per Association of India Universities (AIU)"

- Commodity Markets
- Input, Seeds, Horticulture (Optional)

SEMESTER-IV

- 6 months duration project followed by seminar, project and presentation.

FPM-FELLOW PROGRAM IN MANAGEMENT

Information and guidance for students looking to pursue FPM at NIMT

OBJECTIVE

The objective of Fellowship Program in Mgmt. (FPM) is to provide high quality management education to develop outstanding scholars for careers in teaching and research at leading business schools and universities. The program of study builds on the powerful tradition at NIMT of excellence in teaching and on the extensive resources available for research at NIMT. The institute currently offers fellowship program in following areas of specialization:

Business Policy & Strategic Management.
Economics
Finance Management
Human Behavior & Organization Development
Human Resource Management
Marketing Management
Operations Management

The FPM is a residential program and would take approximately three and a half to four years to complete. During this period, students are expected to undergo course work and submit a thesis at the end of the program. The programme commences on August every year.

COURSE WORK

The first phase has been designed to provide essential exposure to various areas of management. This basic input is followed by a series of doctoral level courses and other educational activities. In the second phase to prepare the student for a teacher-researcher role before he/she embarks on a piece of doctoral level independent research, which is expected to result in original contribution to the existing stock of knowledge.

Phase-1

This phase of course work comprises three terms of three months each. To get substantial exposure to various sub- areas of management and a first hand experience of Post- Graduate Management Education, the student is required to go through the compulsory courses in the Post Graduate Program in Management (PGDM) at the institute. details of courses in the three terms are given below.

In addition to the compulsory courses from PGPM, requisite elective courses be designed for each FPM student to start the process of developing a deeper appreciation of knowledge base in his/her field of specialization.

EXEMPTION FROM PHASE-1

This phase of course work comprises three terms of three months each. To get substantial exposure to various sub- areas of management and a first hand experience of Post- Graduate Management Education, the student is required to go through the compulsory courses in the Post Graduate Program in Management (PGDM) at the institute. details of courses in the three terms are given below.

Phase-2

This is the phase of the course work to prepare the student to be serious in the field of management with special emphasis on his/her area of specialization and related areas on interest. This phase also comprises three terms of three months each. In this phase, the student undertakes three kinds of courses/activities. These are FPM Compulsory Courses.

The compulsory courses are aimed at two basic skills required for the teacher researcher role. The student must become adept at conducting high quality research using the latest available quantitative and qualitative research methodologies for the persistent and emergent management problems in his/her area of specialization. Thus, there shall be one or two advanced courses on research methodologies and technologies. There shall, be course on communication and pedagogy. Student Student would also take an advanced course on Business Policy and Strategic Management to tie together their exposure to various functional management courses.

FPM Electives

The elective courses are designed to make the student familiar with the historical and emergent theoretical developments in their areas of specialization and related areas of interest. Through these structured courses, students are expected to develop high level intellectual skills to critically examine the theoretical developments and contribute to debate on these subjects. The programme would require six such courses from each student, four from the area of specialization and two from areas of related interest.

Comprehensive Assessment

At the completion of all the requirements of course work, the student would have to go through a comprehensive assessment through a written and oral examination. This is to check a scholar's multi-disciplinary application of management as a domain of knowledge and his/her readiness to undertake original research to address current issues and concerns in the field.

Thesis Proposal Management

The work of doing a piece of original starts with the student's choice of a thesis under guidance of the Chairperson, who shares a common interest with the student, and other members of a thesis committee. The student works with the committee to formulate a research design that leads to the creation of a thesis proposed. The proposal is then presented in an open seminar. The thesis committee gives go-ahead to the student.

Thesis

Work on the thesis is the culminating phase of the fellow programme. The work is expected to provide a distinct contribution to the knowledge of the subject and should offer evidence of originality, shown by the discovery of new facts and by the exercise of independent critical power. This would require either original theoretical work or empirical work with primary or secondary data. The thesis work amounts to the preparation of a research monograph establishing its author as a person who can speak with authority in the field. Before submitting the thesis for final examination, the student would give an open seminar of comments and suggestions in the presence of

the chairperson of the thesis committee. After incorporating any suggestions from the open seminar, the student would seek approval of members of the thesis committee.

Thesis Examination

Once the thesis committee has approved the thesis, the Chairman (FPM) would appoint a Thesis Examination Committee. The committee would undertake an exhaustive and vigorous oral examination of the candidate. In case the thesis is not rejected outright, the thesis would be accepted either in the submitted form or certain modification might be asked for, which will have to be incorporated before the final acceptance.

The Final Requirement

The critical study, thinking and research undertaken by the fellow program student during the program is expected to provide basis for articles in referred academic journals. One of the objectives of the program is to educate scholars who would be ready to contribute in this manner. Hence, the final requirement for qualifying for the title of the fellow is to have at least two articles accepted for publication in referred journals.

ADMISSION REQUIREMENT

NIMT is looking for candidates with a consistently good academic record, professional accomplishments and a strong urge to contribute to the process of knowledge creation and dissemination in the field of management. Candidates should have a Bachelor's degree in engg or a Master's degree in any basic discipline with a minimum of 55% marks in the qualifying examination. Those with professional experience will have an advantage.

LAW COURSES

✓ BACHELOR OF ARTS
BACHELOR OF LAW
(BA LLB)

LAW

BA LLB (Bachelor of Arts Bachelor of Law) is a five-year integrated programme, offered at the undergraduate level. Students aspiring to build a career in law can opt for this course, after passing 10+2 examination. Undergraduates in the field of law are imparted comprehensive knowledge about the Indian Penal Code.

Law undergraduates should complete compulsory internship at the end of the course, at various law firms. BA LLB degree course provides myriad career opportunities.

“Live as if you were to die tomorrow. Learn as if you were to live forever.”

- Mohandas Karamchand Gandhi

After doing the course, one can enter the field of law, and work as lawyer in the courts at different levels. Corporate lawyers are also in great demand, in the present time.

RENNOVATE YOUR PROFESSIONAL ATTITUDE

NIMT makes continuous investments in Total Quality Management of Education & firmly believes that if you impart good quality training to your student managers, companies will roll out the red carpet for them. NIMT has more than 1231 big industries & business organizations on its panel for on-the-job placement. The institute keeps in touch with the industries through the alumni & faculty. Institute also has wide network of contacts with various business houses directly.

Average Salary (Domestic Offers) : Rs 5.25 lacs/annum

FACTS

Tie ups with business schools/universities abroad : 55.

Tie-up with a foreign school for exchange program : Yes.

Placement : 100%.

No. of dollar denominated salaries (international offers) : 12 nos. with average salary of Rs. 7.30 Lac (p.a.).

Autonomous body under the purview of Ministry of HRD, Government of India.

Approved and recognized by (AICTE) ministry of HRD, Government of India.

Diversity in its student body, in education, professional experience ethnicity, and even personal accomplishments. (Major applicants student to come from engineering stream). Unique portfolio faculty model. Visiting faculty from our schools and other top global b schools complement the expertise of our resident faculty. Currently there are 7 resident faculty member at full capacity, the school will have a ratio of 60:40 with international faculty forming the larger group. Global emphasis in every aspect of NIMT curriculum, giving students an international perspective to consider and act upon worldwide opportunities. The International Student Exchange Program gives students the opportunities to study for two terms at a leading business school. Visiting students add to the diversity and richness of the peer learning experience.

Why Recruit From NIMT

NIMT aims to nurture graduates who are critical thinkers, creative and globally effective by providing a diverse, all-encompassing and holistic education experience. Students are given the flexibility to chart their own academic courses from a wide selection of modules and multi-disciplinary initiatives.

Innovative programmes that are unique to NIMT further broaden our students' intellectual and global outlook, With a multi-faceted education programme that meets student aspirations and passions while addressing future challenges, we aim to develop well-rounded, academically strong individuals steeped in values, who will become global citizens and leaders of society.

Students are given live projects in the form of business analysis, making new business plans, conducting surveys and encouraging them to take up new entrepreneurial activities.

To apply to NIMT an applicant must submit the online 'Application Form'. There is one common Application Form for all five campuses – Ghaziabad, Greater Noida and Jaipur. It is to be noted that on the Application Form the candidate must provide educational qualifications, contact details, etc. The applicant is also required to fill the IDs and scores of all the entrance exams he/she has appeared in.

After completing the form, the applicant can make payment by one of three options:

1) Pay directly through credit/debit card: If the payment goes through and 'Application Number' is generated, the application is considered submitted. Applicants will receive a confirmation email within the next 24 hours.

2) NEFT/RTGS transfer Or Cash deposit to NIMT account: You may pay your application fee by NEFT/RTGS transfer or deposit cash to NIMT account. You will be required to email your application number alongwith transaction id/scanned copy of deposit slip to admissions@nimtgroup.edu.in

3) Pay through demand draft: Indian applicants must make a demand draft payable to "NIMT" at Ghaziabad/Delhi for the amount of Rs 750. International applicants must make a demand draft payable to "NIMT" at Ghaziabad/Delhi for the amount of 15 USD. On the 'Application Form', applicants must provide the demand draft number, name of bank, date, location of bank and amount. Applicants must affix their passport-size self-attested photo in the application and send the demand draft along with it. Once the demand draft and application form are received by NIMT, Applicants will receive a confirmation email within the next 24 hours.

Applicants are advised to have their demand draft details ready before filling the form.
